- Reward on orders

Development Skills:

Laravel | React Native | Javascript | Firebase | jQuery | AJAX | Saas | Bootstrap | Git | JSON

Website: <https://megathykom.com/>

iOS: <https://apps.apple.com/gb/app/megathy/id1227682497>

Android: https://play.google.com/store/apps/details?id=com.megathykom&hl=en_IN&gl=US

#2 Hawkeye Legacy / React Native

Hawkeye Legacy set out to build a platform for alumni to continue their bond with Iowa Football, create friendships across decades of former players, and foster mentorship and job opportunities. We feel that the vision is coming together.

Hawkeye Legacy has quickly become the envy of college football programs everywhere. Alumni return to campus in droves to celebrate reunions of their accomplishments on the field, meet up to provide guidance and job opportunities to younger generations, and host gatherings in various cities across the country. Each event is rooted in a common connection to Iowa Football and serves to bring the Legacy Hawks closer to their program and to each other.

> Hawkeye Legacy has Features Like

- Broadcast seminars and events in real-time
- Real-time chat and good-natured banter on gameday chats
- Job Board for employers who love athletes, Explore, apply, and track progress
- Create, post, and share upcoming events. Assign tasks to make events memorable
- Send the right messages at the right times to keep awareness high.

Development Skills:

React Native | Javascript ES6 | Firebase | REST API | Git | JSON | NPM | Socket.io

iOS: <https://apps.apple.com/in/app/hawkeye-legacy/id1507922846>

Android: https://play.google.com/store/apps/details?id=com.nextplay.hawkeyelegacy&hl=en_IN&gl=US

#3 Vector Rideshare / React Native

Vector Rideshare is the safest carpooling application for college students and faculty, any individual driver can create trips to make money and if you don't have any car then you can find other person trip and you can join it.

University Carpooling Platform that connects students, parents, and faculty at schools across the country. Post the next trip you plan to make to the concert, airport, or anywhere in the country, and allow others in the Vectorean network connected by your '.Edu' email to ride with you in a SAFE, cheap, efficient mobile application.

> Vector Rideshare has Features Like

- Create trip and make money or find trip for your destination
- Real time chat with trip creator
- Schedule trip

Development Skills:

React Native | Javascript ES6 | Firebase | REST API | Git | JSON | NPM

iOS: <https://apps.apple.com/in/app/vector-rideshare/id14840889591>

Android: https://play.google.com/store/apps/details?id=com.vectorrideshare&hl=en_IN&gl=US

#4 Zimdle / Laravel & CI

Zimdle provides real-time customer feedback and business performance monitoring for any business. Zimdle is all about helping businesses to succeed. We believe businesses that continuously monitor their customer's experience are more likely to have happy customers and are more likely to succeed.

Zimdle helps businesses succeed by collecting structured feedback which can be used to identify problems and areas for improvement.

They want to give business owners more opportunities to understand your business from your perspective without fearing a public execution via social media.

Feedback provided via Zimdle goes directly to the business owner.

> Zimdle has Features Like

- Receive instant customer feedback
- View feedback history stats and charts Identify trends in customer satisfaction
- Receive reports and alerts
- Improve Your Business
- Understand your customer experience
- Compare your business performance with similar businesses

Development Skills:

Laravel | CI | Javascript | jQuery | AJAX | Saas | Bootstrap | Git | JSON
